PROFILE

Computer Science graduate with hands-on experience in C#, ASP.NET Core MVC, Entity Framework Core, and SQL Server through software development projects and a Software Engineering internship. Skilled in developing web applications, business workflow systems, and database-driven solutions with a strong foundation in object-oriented programming and software engineering principles.

EXPERIENCE

Full-Stack Development Intern | Deanship of Information Technology, King Faisal University

Al-Ahsa, Saudi Arabia | June 2025 – December 2025

- Developed features for a web-based internship management platform used to manage student applications, company placements, and internship workflows.
- Built and maintained application components using C#, ASP.NET Core MVC, Entity Framework Core, SQL Server, and LINQ.
- Designed database tables, relationships, and queries to support business requirements and ensure data integrity.
- Implemented responsive user interfaces using HTML, CSS, Bootstrap, and Figma-based designs.
- Performed debugging, testing, and issue resolution to improve application reliability and maintainability.
- Applied MVC architecture, repository pattern, and software engineering best practices throughout the development lifecycle.

EDUCATION

Bachelor of Science in Computer Science

King Faisal University | January 2026

PROJECTS

PerfInsight – KPI & Performance Review Platform (.NET) | [<https://github.com/Almousa1/PerfInsight>]

- Architected a bilingual, dual-theme evaluation platform with 4 role-based workspaces and weighted KPI scoring with strict evidence verification workflows.
- Integrated SignalR for real-time in-app notifications and built interactive, auditable admin dashboards utilizing ApexCharts and DataTables.

TaskFlow – Bilingual Task Management System (.NET) | [<https://github.com/Almousa1/TaskFlow>]

- Developed a robust task tracker with full CRUD, advanced filtering, and color-coded priorities, featuring a secure Admin Panel for user role management.
- Engineered the entire UI with full bilingual localization, automatic RTL layout switching, and strict Authentication/Authorization protocols.

Content Creators Booking & Management System

- Built a full-stack workflow system automating multi-step approval flows to eliminate operational bottlenecks for content creator scheduling and management.
- Designed complex Role-Based Access Control (RBAC) workflows tailored specifically for Admin, Manager, and Creator roles.

TECHNICAL SKILLS

- Programming: C#, SQL, JavaScript
- Frameworks & Technologies: ASP.NET Core MVC, Entity Framework Core, SQL Server
- Web Development: HTML, CSS, Bootstrap
- Tools: Git, GitHub, Visual Studio
- Software Design: MVC Architecture, Repository Pattern

LANGUAGE

- Arabic: Native
- English: Advanced
